

DEVELOPER OF THE EXCLUSIVE
pace pallet management™ ppm™

The complete Make - Manage - Recover - Repair (M2R2™) service.

cost effective • standard & custom-designs available on-demand • weekly reporting • green friendly

 **PACE PALLET MANAGEMENT (PPM)™.**
Exclusive To Pace Pallet Services.

Our years of experience in the timber pallet-crate-skid-box industry have led to the development of a unique system which ensures that you won't run out of pallets and crates - whilst providing attractive cost savings and benefiting the environment. We call it Pace Pallet Management (PPM) and it features inter-connected Pace Pallet Products (PPP), Pace Pallet Collection (PPC), Pace Pallet Repair (PPR) and Pace Pallet Waste (PPW).

Knowing that there can be fluctuations in the numbers of stock required at any one time for your shipments, Pace Pallet Services conducts regular audits of pallet stocks. Usually these are every week. We provide weekly reports on the types and quantities of available stock as well as updates on damaged stock.

We practice a 'lean yard stock' procedure. This ensures that you are not having to pay to transport or store unnecessary volumes which adds to your overheads. When extra pallets or crates are required we can supply them on-demand.

You can easily request extra quantities of pallets and crates using the exclusive software package which we developed. The dashboard shows stock levels and locations of stock. Each type of pallet and crate is coded and all it takes is a few keyboard clicks and our workshop will immediately schedule new stock to order.

Unique To Your Solution

PACE PALLET PRODUCTS (PPP)™.

The Pace Pallet Services workshop manufactures softwood and hardwood pallets, skids and crates to order. Our in-house designer uses industry-specific CAD software to design one-off or low-volume made-to-order custom pallets and crates. These are often for fragile or uniquely shaped products which will not fit on a standard pallet.

PACE PALLET COLLECTION (PPC)™.

PPC is all about "reverse distribution". Pace Pallet Services has a fleet of trucks which cover the whole Sydney area and recover discarded and damaged stocks on your behalf and take them to our Wetherill Park-based workshop.

PACE PALLET REPAIR (PPR)™.

When a damaged or discarded pallet or crate can be "re-birthed", our workshop is able to make the necessary repairs. We have a range of timber stocks available to quickly return a pallet or crate to 'active service'.

PACE PALLET WASTE (PPW)™.

When pallets and crates are beyond repair they still have a useful purpose. The timber is shredded and used as animal bedding or mulch. This reduces the amount of timber being sent to landfill and reduces carbon emissions. The "green friendly" process is known as Pace Pallet Waste (PPW).

PACE PALLET SERVICES

Pace Pallet Services has established an enviable reputation over the years in Sydney for its innovation and "Can do" attitude. Managing Director Michael Mourad leads a dedicated team with decades of combined experience in the pallet, manufacturing and freight industries. Our ability to engineer a cost-effective solution for every client has seen us help the likes of Bluescope Steel, CSR, EDI and Onesteel.

Pace Pallet Services is a single source supplier. Our "set and forget" service means our clients can focus on their businesses.

We provide:

- custom design pallets, skids, crates, boxes
- reconditioned pallets
- special projects
- complete pallet management
- repairs & recycling
- timber packing & dunnage
- pallet collection

Our seamless custom design-manufacturing service saves money because we maximise the number of products per shipment compared to what a standard-sized crate or box will allow. By designing it to suit the dimensions of your product we minimise movement and breakage during transport.

Pace Pallet Services has comprehensive knowledge of the lifting, moving, carrying and stacking procedures of transport and logistics companies and we design each crate and box for ease of use. We design-manufacture crates and boxes for a wide range of applications - from mining machinery and manufactured parts to household appliances, construction products to steel panels, motor bikes to vintage cars, sheets of glass to wine bottles, exhibition and retail displays to luxury furniture, sculptures and artwork to livestock.

Pace Pallet Services has a solution to store and move every object. From quantities of 1 to 1000.
